PROFESSIONAL PROFILE

Results-driven Full-Stack Engineer specializing in scalable business applications, secure REST APIs and role-based platforms. Independently architected and delivered an end-to-end school management system for a real institution, spanning a Next.js frontend, a modular Express.js backend and an event-driven WhatsApp notification microservice.

Combines disciplined engineering practices (type-safe code, clean architecture, rigorous data modeling) with a business administration background that sharpens product and stakeholder thinking. Available for freelance engagements and remote roles with startups and business-software teams.

SELECTED PROJECTS

Al-Iman School Management System (ERP)

Next.js · TypeScript · Express.js · Prisma · PostgreSQL · Node.js Microservice

Live Demo · GitHub Repository

- Architected and delivered, as sole engineer, a multi-role ERP that digitizes admissions, attendance, examinations, results and fee invoicing for administrators, teachers, students and guardians.
- Engineered strict Role-Based Access Control across four dedicated portals, with dual-mode authentication supporting email or phone login and student-code with PIN login.
- Designed an independent WhatsApp notification microservice (Baileys) delivering instant absence alerts and admission credentials to guardians, secured with inter-service secret-key authentication.
- Eliminated request timeouts during bulk attendance submission by decoupling notification dispatch from the request cycle using asynchronous *setImmediate* queuing.
- Resolved attendance inconsistencies caused by UTC offsets through start-of-day and end-of-day range filtering, and unified student identity resolution with multi-field Prisma queries.
- Established a maintainable architecture: modular controller-service-route backend, Zod validation, JWT with BCrypt hashing and a centralized Axios client with interceptors.

Foodie

Next.js · TypeScript · Prisma · PostgreSQL

Live Demo · GitHub Repository

- Independently designed and developed the complete full-stack application, including secure authentication, role-based dashboards and a RESTful API.

LEADERSHIP & COMMUNITY

Youth Foundation and other social organizations. Held front-line leadership roles, directing community initiatives and coordinating teams. Developed strong communication, accountability and collaboration skills that translate directly into client engagement and project delivery.

TECHNICAL EXPERTISE

Frontend
Next.js (App Router), React, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Framer Motion

Backend
Node.js, Express.js, RESTful API Design, Prisma ORM, Zod Validation, Microservices

Databases
PostgreSQL (Neon), MongoDB, Relational Schema Design

Auth & Security
JWT, BCrypt, Role-Based Access Control (RBAC), Better Auth, Firebase Authentication

DevOps & Tools
Git, GitHub, Docker, Postman, Vercel

EDUCATION

Bachelor of Business Administration
National University, Bangladesh
Ongoing

Programming Hero
Web Development Student

LANGUAGES

Bangla · Fluent

English · Conversational
